Professional Summary

I'm passionate about machine learning and deep learning, and I've spent the last two years at CUTM Bhubaneswar bringing that passion to life through hands-on projects. I mostly work with PyTorch, scikit-learn, and Python, but I can handle Java too. I love getting into the backend, messing around with data visualization, and staying on top of new trends in generative AI. I'm looking for a role where I can build new things, experiment, and keep learning every day.

Experience

Machine Learning & Deep Learning Intern

Present

PyTorch and Scikit-learn Based Development

- Built and trained machine learning and deep learning models from scratch using PyTorch and scikit-learn.
- Ran the full pipeline — from cleaning data and engineering features to tuning models and evaluating results.
- Worked on both supervised and unsupervised prediction tasks.
- Developed generative AI apps with LangChain, Hugging Face, and RAG.
- Explored AI in healthcare and built smart chatbots.

Education

Centurion University of Technology and Management (CUTM), Bhubaneswar

Student

2 years of academic experience

Relevant Courses: Machine Learning, Deep Learning, Data Science

Projects

E-Commerce Application

- Built a secure full-stack e-commerce platform with product management.

Chat Application

- Developed a real-time chat app with a friendly UI and solid backend APIs.

Notes Taking Application

- Designed a simple notes app with basic create, read, update, and delete features.

News Application

- Made a live news app that fetches headlines from APIs.

Generative AI Chatbot (RAG-Based)

- Built a document-aware chatbot using LangChain and Hugging Face.
- Used RAG architecture to give smarter, context-driven answers.

Publications

Graph-Based Analysis and Prediction of Social Media Addiction Using Machine Learning

- Built an end-to-end ML pipeline to predict social media addiction from behavioral data.
- Handled data cleaning, exploration, feature correlation, and outlier removal.
- Encoded categorical data with label and one-hot encoding.
- Trained and tuned Extra Trees, Logistic Regression, Random Forest, and Gradient Boosting models with Grid-SearchCV.
- Extra Trees came out on top with R^2 score of 0.94 and AUC of 0.99 (Youden's J statistic).
- Shared results with tree visualizations and model comparisons.

Certifications

- **Python Bootcamp** — Udemy
- **Java Programming** — Scalar Academy
- **Java and DSA** — GeeksforGeeks
- **Hackathon Participation** — University/Technical Event

Technical Skills

Programming: Java, Python

ML and AI: Machine Learning, Deep Learning, Scikit-learn, PyTorch, Generative AI, LangChain, Hugging Face, RAG, LLMs

Data Visualization: Pandas, NumPy, Matplotlib

Web and Backend: HTML, CSS, Flask, FastAPI, Streamlit, Pydantic

Database: MySQL (basic)

Interests and Activities

- I like building AI-powered web apps and smart chatbots.
- I'm curious about how AI and healthcare connect.
- I jump into hackathons and tech competitions whenever I get a chance.
- Always learning new ML and generative AI skills.
- I stay involved in the AI community on Twitter and enjoy sharing what I pick up.
