Professional Summary

Motivated Machine Learning and Deep Learning enthusiast with 2 years of academic experience at CUTM Bhubaneswar. Experienced in developing real-world ML, DL, and Generative AI solutions using PyTorch and Scikit-learn. Strong foundation in Python, Java, backend frameworks, data visualization, and modern GenAI tools. Actively seeking opportunities in the Machine Learning and AI domain.

Experience

Machine Learning & Deep Learning Intern

Present

PyTorch & Scikit-learn Based Development

- Developed and trained Machine Learning and Deep Learning models using **PyTorch** and **Scikit-learn**.
- Performed data preprocessing, feature engineering, model evaluation, and hyperparameter tuning.
- Implemented supervised and unsupervised learning algorithms for predictive analysis.
- Built Generative AI applications using **LangChain**, **Hugging Face**, and **Retrieval-Augmented Generation (RAG)**.
- Explored real-world AI use cases including healthcare systems and intelligent chatbot solutions.

Education

Centurion University of Technology and Management (CUTM), Bhubaneswar

Student — 2 Years Academic Experience

Relevant Coursework: Machine Learning, Deep Learning, Data Science

Projects

E-Commerce Application

- Designed a full-stack e-commerce platform with secure user authentication and product management.

Chat Application

- Built a real-time chat application with backend APIs and UI integration.

Notes Taking Application

- Developed a notes management application supporting CRUD operations with a clean UI.

News Application

- Created a news aggregation application using APIs to fetch and display real-time news.

Generative AI Chatbot (RAG-Based)

- Developed a document-aware chatbot using LangChain and Hugging Face models.
- Implemented RAG architecture for accurate and context-aware responses.

Publications

Graph-Based Analysis and Prediction of Social Media Addiction Using Machine Learning

- Proposed a complete machine learning pipeline for predicting social media addiction using structured behavioral data.
- Performed data cleaning, exploratory data analysis (EDA), feature correlation analysis, and outlier treatment using IQR capping.
- Applied encoding techniques including Label Encoding and One-Hot Encoding for categorical features.
- Trained and optimized multiple models such as Extra Trees (ET), Logistic Regression (LR), Random Forest (RF), and Gradient Boosting using GridSearchCV.
- Achieved best performance with the Extra Trees model, obtaining an R^2 score of 0.94 and an AUC of 0.99 using Youden's J statistic.
- Enhanced model interpretability through tree-based visualizations and comparative performance analysis.

Certifications

- **Python Bootcamp** — Udemy (Certificate)
- **Java Programming Course** — Scalar Academy (Certificate)
- **Java & DSA Course** — GeeksforGeeks (Certificate)
- **Hackathon Participation Certificate** — University / Technical Event

Technical Skills

Programming Languages: Java, Python

Machine Learning & AI: Machine Learning, Deep Learning, Scikit-learn, PyTorch, Generative AI, LangChain, Hugging Face, RAG, LLMs

Data Visualization: Pandas, NumPy, Matplotlib

Web & Backend: HTML, CSS, Flask, FastAPI, Streamlit, Pydantic

Database: MySQL (Basic Knowledge)

Interests & Activities

- Building AI-powered web applications integrated with intelligent chatbots.
- Developing AI-driven healthcare-related solutions.
- Participating in hackathons and technical competitions.
- Actively learning emerging technologies in Machine Learning and Generative AI.
- Engaging with the AI community on Twitter and sharing technical insights.
